USER GUIDE

Squeeze Advent

A digital advent calendar with 24 squishy toys, one for each day of December.

index.html
The complete calendar in one file. Open it in any web browser.

How-to video
A 2-minute walkthrough of every feature.

This guide
How to use it, plus how to put it on your own website.

Open online: malik12345510.github.io/squeeze-advent

Quick start

No app, no download, no account. Squeeze Advent runs in the web browser you already have, on a phone, tablet or computer.

OPTION 1

Open the link

Go to

malik12345510.github.io/squeeze-advent

in Chrome, Safari, Edge or Firefox. Bookmark it or add it to your home screen.

OPTION 2

Open the file

Double-click **index.html**. It opens in your browser and works the same way. Keep the file somewhere you can find it again.

The wall

This is the home screen. Everything starts here.

1. **Stats**
   Doors opened, days until Christmas and your total squeezes.

2. **Preview mode**
   Switch it on to unlock all 24 doors right away. Great for trying it out before December.

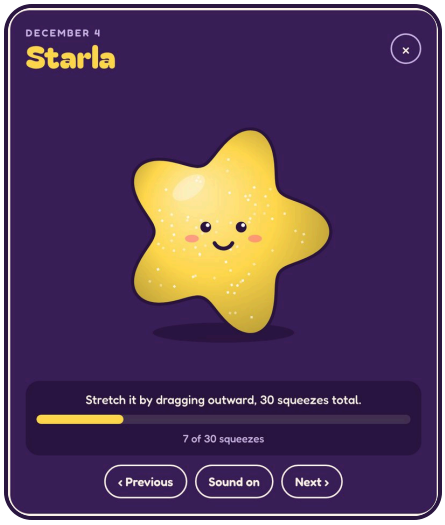

3. **24 doors**
   One for each day, December 1 to 24. Locked doors look faded.

When do doors open?

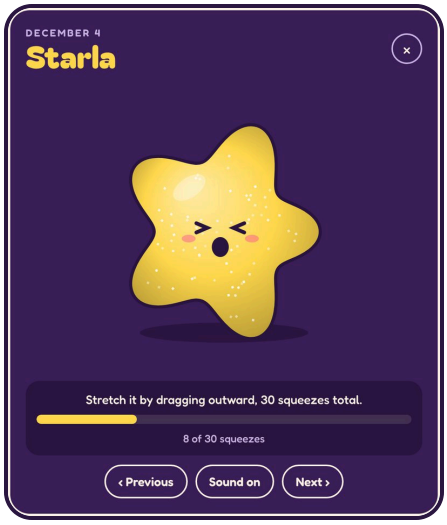

Each door unlocks on its date, using the date on your own device. On December 1, door 1 opens. On December 2, door 2 opens, and so on. Today's door gently bounces so you can find it.

How to play

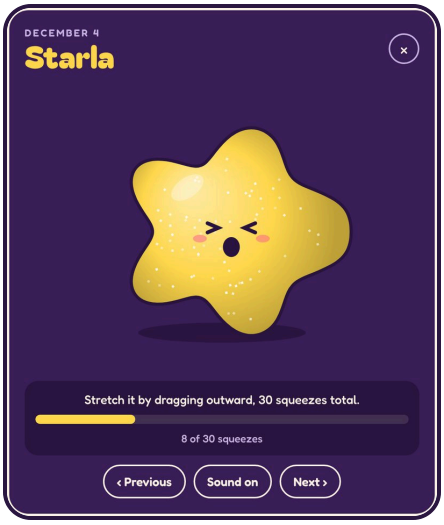

Tap an unlocked door to meet that day's squishy toy. Then get squeezing.

Tap a door to open the toy

Press and hold to squeeze

Hold and drag out to stretch

1 Squeeze

Press and hold anywhere on the toy with your finger or mouse. It squishes, scrunches its face and bounces back when you let go.

2 Stretch

While holding, drag outward past the edge of the toy to stretch it. Let go and watch it wobble back.

3 Listen

Every squeeze plays a different sound: boops, squeaks, pops, boings, bubbles, dings and more. There are 12 sounds to discover. Tap **Sound on** to mute, tap again to turn it back on.

4 Daily challenge

Each day has a squeeze challenge, like "Squeeze it 40 times." The bar fills as you squeeze. Finish it for a confetti celebration.

5 Next and Previous

Move between the days you have unlocked without going back to the wall.

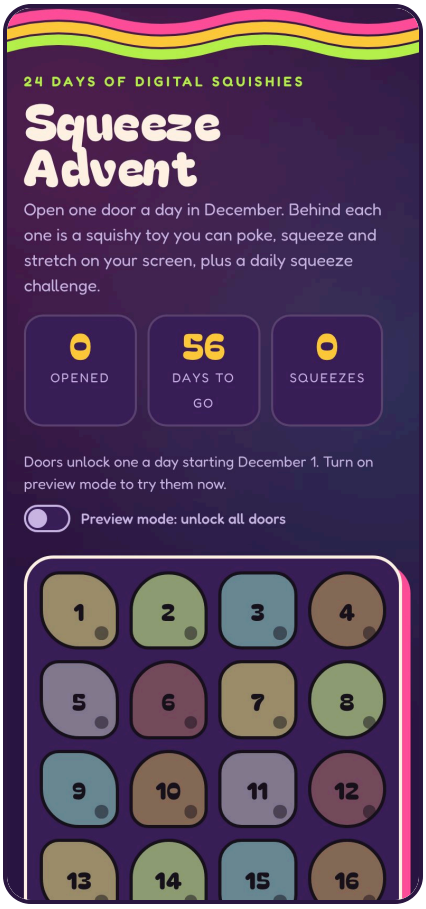

6 Your collection

Close the toy with the × button. The door now shows the squishy you found, so the wall fills up as December goes on.

Saving & devices

Your opened doors, squeeze counts and sound setting save automatically in the browser you are using. Close the page and come back tomorrow: everything is where you left it.

- **One browser, one save.** Progress on your phone does not carry over to your laptop. Pick one device for the whole month if you want one collection.
- **Clearing browser data resets it.** So does a private or incognito window, which forgets everything when closed.
- **Works on any screen.** The layout adjusts for phones, tablets and computers.
- **Keyboard friendly.** Use Tab to reach a door and Enter to open it. On a toy, press Space or Enter to squeeze.

On a phone

Quick fixes

All the doors are locked	Doors open from December 1. Check your device's date, or switch on Preview mode.
I can't hear anything	Make sure the button says "Sound on", your volume is up and your phone is not on silent. Browsers only play sound after you tap the page once.
My progress disappeared	You may be in a different browser, on another device, or in a private window. Progress is saved per browser.
The letters look plain	The playful fonts load from the internet. Without a connection the calendar still works with standard fonts.
Can I start over?	Yes. Clear this site's data in your browser settings, and the calendar starts fresh.

Put it on your own website

The whole calendar is one file, **index.html**. There is no server code and no database, so you can upload the source file to almost any website or web host.

FREE · ABOUT 5 MINUTES

GitHub Pages

1. Sign in at github.com and create a new **public** repository.
2. Choose **uploading an existing file** and add **index.html**. Commit.
3. Open **Settings** → **Pages**, set Branch to **main** and folder to **/ (root)**. Save.
4. After a minute your link appears: `yourname.github.io/repo-name`

FREE · ABOUT 2 MINUTES

Netlify Drop

1. Put **index.html** in a folder on your computer.
2. Go to `app.netlify.com/drop`.
3. Drag the folder onto the page.
4. Netlify gives you a live link. Create a free account to keep it.

YOUR EXISTING WEBSITE

cPanel, FTP or any web host

Make a folder such as `squeeze-advent` inside your site's main folder (often `public_html`) and upload **index.html** into it. It will open at `yourwebsite.com/squeeze-advent/`. Keep the file name **index.html** so the short link works.

WORDPRESS, SHOPIFY, WIX, SQUARESPACE

Show it inside a page

First host the file with one of the options above. Then add an **HTML** or **Custom code** block to your page and paste this, replacing the link with yours:

```
<iframe src="https://yourname.github.io/squeeze-advent/" width="100%" height="900"
style="border:0;border-radius:16px" title="Squeeze Advent" allow="autoplay"></ifra
me>
```

Visitors play right on your page. Each visitor gets their own saved progress in their own browser.

Good to know

Share the link

Send your link by text, email or social media. Everyone who opens it gets their own calendar and their own progress.

Add to home screen

On iPhone, tap Share then **Add to Home Screen**. On Android, tap the three-dot menu, then **Add to Home screen**. It opens like an app.

For families and classrooms

Open it on a big screen each morning in December and let a different person squeeze the toy of the day.

Updating your copy

To change your hosted version, upload a new **index.html** over the old one with the same name. The link stays the same.

What's inside each day

24 original squishy characters, each with its own shape, color, texture and squeeze challenge: Cherry Bop, Lemon Squeezy, Minty Puff, Starla, Blueberry Blob, Pine Squish, Gumdrop Gus, Snowy Sam, Peachy Keen, Grape Jelly, Daisy Doo, Cocoa Mallow, Sweetheart, Kiwi Kid, Lava Lump, Frosty Star, Bubblegum, Tangerine Tom, Moon Pie, Holly Jolly, Sprinkle Sue, Cloud Nine, Jingle Jelly and, on December 24, the Big Squeeze.

Happy squeezing!
